Picture
Delivery Specs 2016

Please provide a **Quicktime** movie with the following specifications:

Codecs

We prefer **APPLE PRO RES LT** or **AVID DNxHD 36**

H.264s can also be delivered to save file size.

Please note, a conversion to our preferred codecs will take place when we receive it.

Timecode

Please supply **visual burn-in timecode** and make sure that the **frame rate matches** the editing sequence.

Resolution

Please submit a **1280x720** or **1920x1080** pixel file.

Aspect Ratio

The aspect ratio of your picture reference should match the ratio of the AVID or Final Cut Pro sequence.

Framerate

The framerate of your picture reference should match the framerate of the AVID or Final Cut Pro sequence.

Audio for ADR/VO

If providing picture reference for ADR or Voice Over projects, please be sure to provide audio splits.

It is preferred that the left channel of the video reference contain only production and/or dialogue while the right channel contain only music and/or effects.
